Sample Test Packet

Mechanics Program

As part of the Selection Process you will be required to test and receive a passing score on the following:

- Mechanical Aptitude
- Problem Solving
- Precision Measurement
- Electrical Aptitude

This packet, which includes sample test questions from some of the above topics, has been provided for your review.

Additional sample test questions may be available on the “Sample Test” page and the “Resources” page of the Program’s website wpaoperators.org, or by searching the above topics on the internet.
### Mechanical Aptitude

**Problem Solving**

#### Example Passage

Making a hole in a piece of metal is a fairly simple operation. In order to make the hole accurately and quickly, a drill press may be used. The twist drill is the tool used to make the hole. It consists of a cylindrical length of steel with spiral grooves. The grooves, often called flutes, are either cut into the steel cylinder or are made by twisting a flat length of steel into a cylindrical shape.

**Practice Exercise X**
